

04.11.2010

Program:

“Renewable energies and snow: towards a sustainable snow production”

Friday, November 5th, 2010, 15.00 to 18:00

Venue: A-1040 Wien, Operngasse 11/5, seminar room (we changed room!),

Block 1: “Saving energy and resources by good ski area management”,

Impulsive statement 1: “The sustainability of snow making” Robert Steiger, Univ. of Innsbruck, Dep. of Geography

Discussants: Sergey Sokratov, Moscow State University, Michael Bacher, BOKU
Open discussion by all participants!

Summary: “Better ski area management as a mean to sustainable snow production”

Block 2: “Saving energy and resources by (radical) innovation of snow making”

Impulsive statement 2a: “The expected snow quality made by the dendrite generator and its resource consumption” Michael Bacher

Discussants: Robert Steiger, UIB, Michael Bacher, BOKU, Sergey Sokratov, Moscow State University,
Open discussion by all participants!

Impulsive statement 2b: “Alternative energy sources available for a more sustainable snow making” Fred Best, Energy International Limited

Discussants: Raffael Bointner, TUW, Martin Falkenberger, BOKU
Open discussion by all participants!

Summary: “Better technology as a mean to sustainable snow production”

Coffee & Cake Session

Block 3: “Outline improvements to declaration on sustainable snow production”

<http://ttl.tuwien.ac.at/docs/declaration-sustainable-snow-production.pdf>

End of event
